AFTER INSTALLATION CARE

After your cabinets have been installed, wipe down all exteriors with a damp cloth to remove dust. Clean Up: Wash WeatherStrong with water and a soft cloth or sponge. A mild dishwashing liquid can be used if needed. For tougher to clean spots, wash with Simply Green All-Purpose Household Cleaner. A soft bristle brush may be used if needed.

EVERYDAY CARE

Salt Water Environments: Oceanfront environments with salt air and sea spray will require regular maintenance and cleaning to prevent rust from forming on the handles, hinges and drawer runners. Clean stainless steel surfaces several times a month to keep the chemical reaction from the salt from gaining a foothold on the hardware. With regular cleaning, your cabinets will look like new for many years. To achieve maximum corrosion and stain resistance, the surface of the stainless steel must be kept clean.

Never use abrasive cleaners, scouring pads or powdered cleansers.
HARDWARE CARE
Use mild soap and warm water to clean door, drawer knobs and pulls. Thoroughly dry hardware surfaces after cleaning. **DO NOT** use silver or brass polish.

AVOIDING EXCESSIVE HEAT
Grill and side burner cabinets are manufactured with two full upper face plates that will need to be field modified to accept the respective heat liner used with the gas grill or side burner.

The second matching panel will be shipped loose for ease of modification and installation. It can be attached with stainless steel screws or a suitable construction grade adhesive. Under no circumstance should a grill or side burner be installed without the appropriate heat liner specified by the manufacturer of the appliance.

LIGHT EXPOSURE
Finishes with logo ☀ ☀ are recommended for indoor wet or dry areas such as laundry rooms and garages or for any outdoor space where surface temperatures do not exceed 220° F.

Finishes with our logo ☀ are recommended for indoor wet or dry areas such as laundry rooms and garages or any outdoor space in shaded or partially covered areas where surface temperatures do not exceed 140° F.

SHELF PINS
Cabinet shelves feature locking shelf pins. To release, simply push in the tab and lift the shelf.

DRAWER FRONT ADJUSTMENT
If additional adjustment is required, loosen screws and twist drawer front for proper alignment. Tighten screws securely.
DRAWER REMOVAL MANUAL

STEP 1
Partialy open drawer and remove contents

STEP 2
Locate slide tab on left side of drawer box and push up to release

STEP 3
Locate slide tab on the right side of drawer box and push down to release

STEP 4
To re-install, align drawer slides and gently push drawer closed. Locking tabs do not need to be pressed

STEP 5
Open and close drawer several times to ensure proper alignment
ROLL-OUT TRAY RELOCATION/INSTALLATION

1. Determine location desired and install plastic “back boot” in pre-drilled holes. Attach with screws. Repeat on opposite side.

2. Slide runner into “back boot”. Repeat on opposite side.

3. Attach runner to inside edge of face frame. Note the roller wheel is positioned at the bottom with the opening up. Repeat on opposite side.

4. Install roll-out tray.

In a standard Base Cabinet there are two locations a Roll-out Tray can be installed, indicated by the two sets of pre-drilled holes on the back panel.

ADJUSTING THE DOOR ALIGNMENT - with Phillips screwdriver
DOOR POSITION ADJUSTMENT MANUAL

HEIGHT
Loosen two screws and adjust door to desired position. Re-tighten all screws.

SIDE TO SIDE
Using a Phillips screwdriver, rotate front screw to move the door to the desired position.

DEPTH
Using a Phillips screwdriver, rotate back screw to move the door to the desired position.

HEIGHT
For vertical door adjustment loosen center screw on each hinge. Set door at desired height. Re-tighten each screw.

SIDE TO SIDE
Rotate front screw for horizontal door adjustment.

DEPTH
Rotate back screw for front to back door adjustment.
CARING FOR CABINETRY

After your cabinets have been installed, wipe down exteriors with a clean damp cloth. Work on a small area at a time and thoroughly wipe dry.

If a damp cloth does not sufficiently clean an area, we recommend a non-detergent, non-abrasive household cleaner.
